

Your access to premier, fully integrated infrastructure services

AECOM project teams fuse top technical expertise around the world with deep local experience, to design and deliver infrastructure, utilities and facilities that meet the needs of our clients and the communities.

Across all components of the in-project cycle — design, build, finance and operate — AECOM is uniquely positioned to deliver a differentiated service, working globally and delivering locally. We draw together teams of engineers, planners, architects, landscape architects, environmental specialists, economists, scientists, consultants and construction specialists as well as cost, construction, project and program managers — all dedicated to finding the most innovative and appropriate solutions, and improving quality of life.

About AECOM

AECOM is built to deliver a better world. We design, build, finance and operate infrastructure assets for governments, businesses and organisations in more than 150 countries. As a fully integrated firm, we connect knowledge and experience across our global network of experts to help clients solve their most complex challenges. From high-performance buildings and infrastructure, to resilient communities and environments, to stable and secure nations, our work is transformative, differentiated and vital. A *Fortune 500 firm*, AECOM had revenue of approximately \$18.2 billion during fiscal year 2017. See how we deliver what others can only imagine at aecom.com and [@AECOM](https://twitter.com/AECOM).

Indonesia

AECOM in Indonesia

We work with our clients to imagine and deliver infrastructure for the future, that unlocks new economic growth and livability for Indonesia's population of over 260 million across its 17,000 islands.

Since 1972, we have been channeling our diverse spectrum of capabilities, spanning environmental, transportation, construction, energy and water, to serve Indonesia's infrastructure development.

Our services support our clients' projects through the entire asset lifecycle from early feasibility studies, briefing, design, project management and construction, maintenance and operations and where economically justifiable, financing. Some clients choose to appoint us for a specialist single service expertise; others recognise the value we bring to their projects through our full service offering that we provide through a fully integrated single business approach. It's your choice which of our services you wish to procure for your project. What is important is that you have options with AECOM. You can be assured that at all times our work is characterised by a focus on reducing risk, improving value and assuring outcomes.

A selection of our projects

South Gate Mixed-use Development at Tanjung Barat

Client:
PT Sinarmas Land
Services:
Cost management

Extension of Cargill Plant, Serang, West Java

Client:
Cargill Indonesia
Services:
Project management and construction management

IKEA Garden City, Jakarta

Client:
PT Archipelago Property Development
Services:
Project management and construction management

BSD Grand CBD Urban Design Guidelines, Tangerang

Client:
PT Sinarmasland
Services:
Master planning, landscape architecture and transportation strategy

Grand Dharmahasada Lagoon Surabaya

Client:
PT PP Properti Tbk
Services:
Master planning and architecture

Jakarta - Cikampek Elevated Toll Road

Client:
PT. ACSET Indonusa
Services:
Traffic management and design of traffic signs and marking
