

UNRIVER

G A T E W A Y

Moving forward together.

An aerial photograph of a river valley with lush greenery and some buildings. Overlaid on the image are two pulleys connected by a black rope that runs horizontally across the top. From each pulley, three ropes (yellow, red, and blue) extend downwards and outwards, creating a sense of tension and connection. The background image is slightly faded to make the text and ropes stand out.

The Los Angeles River symbolizes all the potential of our great City, past and future. It's where the City was born, and it should become the center of attention once again. Our vision is a story of connections. Of joining the City with the river and nature, linking neighborhoods separated by the river, and uniting open space, housing, transportation and commerce in ways that will transform Los Angeles for generations to come.

To revitalize the LA River, AECOM can connect the best big ideas with the expertise and resources to realize them. We're listening to citizens, neighborhoods, land owners and environmental organizations. We're collaborating with business and community leaders to deliver an inspired plan that renews the river and enhances the quality of life for everyone who lives, works and plays along its banks.

This is an extraordinary opportunity to enhance the way the river interacts with its urban surrounding, and how communities interact with the river. The time is now to connect the visions and turn ideas into reality. We invite you to learn more about how we can deliver the Los Angeles River of the future.

Moving forward to connect and deliver what is possible.

The Los Angeles River symbolizes all the potential of our great City, past and future. It's where the City was born, and it should become the center of attention once again. Our vision is a story of connections. Of joining the City with the river and nature, linking neighborhoods separated by the river, and uniting open space, housing, transportation and commerce in ways that will transform Los Angeles for generations to come.

To revitalize the LA River, AECOM can connect the best big ideas with the expertise and resources to realize them. We're listening to citizens, neighborhoods, land owners and environmental organizations. We're collaborating with business and community leaders to deliver an inspired plan that renews the river and enhances the quality of life for everyone who lives, works and plays along its banks.

Delivering Sustainability

AECOM developed these concepts guided by the City of Los Angeles' sustainability goals as our foundation. We used our Sustainable Systems Integration Model™ to project the costs and benefits of various planning strategies based on environmental, social and economic outcomes. Our analysis reveals the overall community impact score dramatically improves, with the biggest gains seen in **better access to green space, increased housing options and more jobs close to transit.**

Current Sustainability Scoring

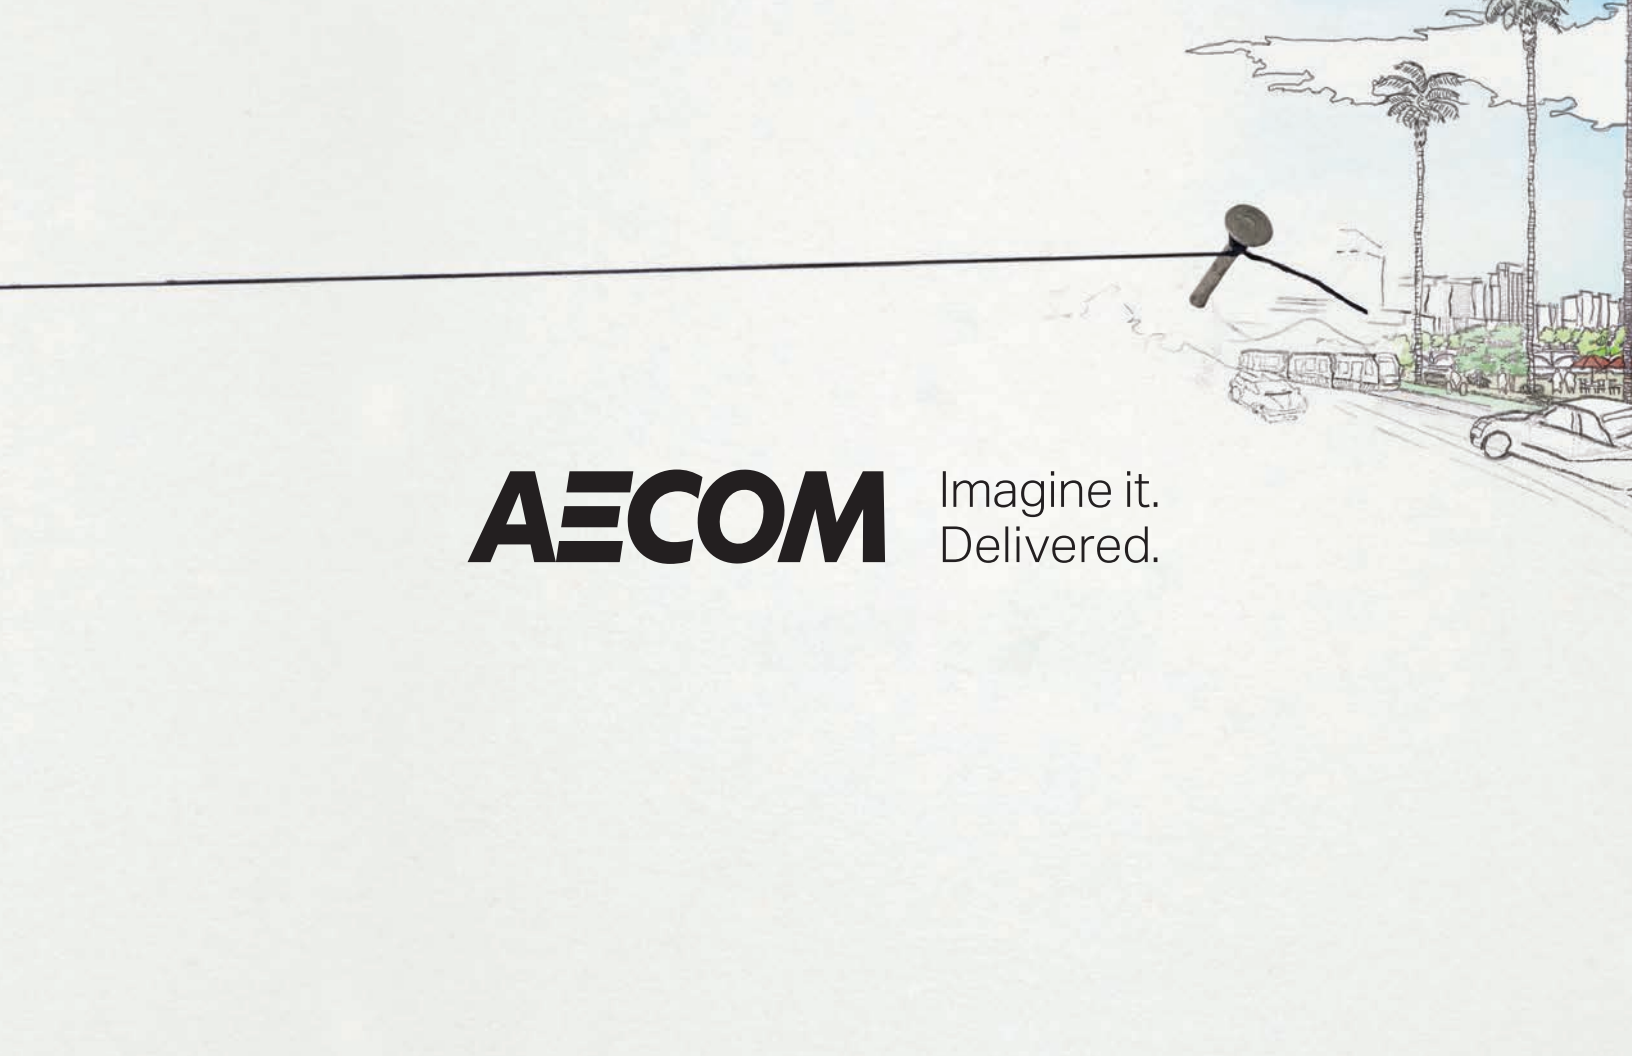

Future Sustainability Scoring

City of Los Angeles Sustainability Metrics

River Access + Open Spaces	Housing	Employment	Mobility + Livability	Sustainability
<ol style="list-style-type: none"> 1. Accessible riverfront 2. Increased open space 3. Open space provision for residents 4. Accessible open space 	<ol style="list-style-type: none"> 1. Increased number of housing units 2. Increased affordable housing units 3. Transit accessible housing 4. Increased number of EJ* housing units 	<ol style="list-style-type: none"> 1. Increased number of jobs 2. Transit accessible jobs 3. Provision of clean tech jobs 	<ol style="list-style-type: none"> 1. Increased resident access to rail transit 2. Provision of neighborhood-scale infrastructure 3. Provision of pedestrian-oriented streets 4. Provision of bicycle paths 	<ol style="list-style-type: none"> 1. Increase in perviousness (removal of concrete) 2. Increase in tree canopy 3. Aquifer restoration (soft riverbed) 4. Habitat provision
