Diversity/ Careers Magazine – Best Diversity Company

Why AECOM?

As a big community of leading experts, we make connections others can't. Where others see technical problems, we see human possibilities.

Across the globe, people are changing the way they work, live and relax. A woman who goes to her office in Tokyo works with a team in New York. A man who commutes has bought an electric car. At AECOM, we seek to help transform communities and positively impact lives by enhancing and sustaining built, natural and social environments to meet the needs of a changing world. This is possible thanks to our experts who work the way you do. We bring together teams of experts from all relevant disciplines to deliver complete, bespoke solutions for every project. We are able to offer clients this global resource locally, as our specialists worldwide can respond to any client anywhere. Yet, the shift to broader horizons hasn't stopped us from concentrating on the cultivation of relationships with our clients. We act as a trusted partner who speaks the local language - many of our people were once clients themselves, so they understand the issues our client may have. We run projects so they are completed to time and budget, and with our strong management and delivery processes, we regularly achieve impressive costs savings on projects of all sizes. Simultaneously, we take the time to understand the scope and specific requirements of every brief, combining business planning with engineering to ensure the delivery of a high quality experience with excellent value. We are able to take your project through its life cycle from inception to design, build, finance and operation.

In a changing world, we make the connections other can't. Where others see technical problems we see human possibilities. AECOM's vision reaches beyond borders while keeping clients' visions at its core.

Our range of services:

- Architecture

AECOM in Turkey

AECOM in Turkey offers a range of services both for local and international clients.

Whether we serve clients at one phase of the project life cycle or throughout it, our role is to apply creative vision, technical expertise, interdisciplinary insight, and local experience to address complex challenges in new and better ways.

We help our clients deliver critical resources and services, improve the places where people live and work, and sustain a world in which we can all flourish.

Since 1993, AECOM has been operating on the Turkish market, providing environmental services. We were the first international environmental technical consulting firm in Turkey. For our client's convenience, we have two offices, which are located in Ankara and Istanbul.

Our design team works closely with the regional Design Hubs in London, Madrid and Moscow. The

combination of certified Architects, Environmentalists and MEP Engineers make us fully compliant to the legal requirements necessary to sign off and issue designs of any complexity, including high-rise towers, hospitals and mix-used projects.

AECOM in Turkey offers a comprehensive range of services for the construction industry, including Project Management, Construction Management, Cost Management, Architecture and Engineering, as well as investment advisory services such as Feasibility and Due Diligence Studies, Lender's Supervision, Site Assessment, Permits and Approvals Management, Technical Supervision, and Equipment Certification.

Our construction management service range only ends when the project is completed, as we are able to provide ramp-up operations, close-out, warranty management and handover services. Combining our

local expertise and capabilities with international experience, we act as a trusted partner to our client, to help them create high-quality buildings that never go unnoticed.

The AECOM team in Turkey has been audited by the British Standards Institute (BSI), and has been awarded ISO 9001:2008, 14001:2004 and BS OHSAS 18001:2007.

There are five business lines in Turkey in which our clients can benefit:

- Environment
- Construction Services (CSD)
- Building Engineering
- Transportation
- International Development

Health, Safety & Environment

AECOM has one of the safest workforces in the world. Safety is an inherent culture within our company, a core value, and a best business practise.

AECOM is a world-class leader in safety, health and environmental performance through the implementation of communication, competent advice and questioning, effective training and education, together with management systems and monitoring programmes. The organisation works with employees and focuses on the wellbeing of all people, as we want everyone to go home safely every day.

We always make sure that safety and health is treated as a core value at AECOM. We promote environmental sustainability through a consideration of how AECOM's work impacts the environment, the efficient use of energy, conservation of natural resources, and prevention of pollution by reusing, recycling and reducing waste whenever practical throughout the company.

Overall HSE goals are simple:

- to eliminate work-related injuries and illnesses
- to prevent damage to property and/or equipment
- to minimise the impact on the environment from our work-related activities.

**AECOM's
employees have
been OSHA
certified and/or
have had OSHA
refresher trainings.**

AECOM has received numerous awards from clients and organisations around the world on numerous occasions as a testament to our commitment to health and safety

Several of AECOM Turkey's recent HSE & D awards are listed below:

- 2004 – The HSSE *"Diamond"* award from BP Remediation Management (RM) Group
- 2005 - The *"Excellence in HSSE"* award from the BP Remediation Management Group
- 2006 - Third Quarter *"Best Quality Near Miss Report Awards"* from BP Remediation Management Group from EMA
- 2007 - The *"Best HSE Performance"* award for the contractors of Tupras Kirikkale Refinery
- 2007 - Third Quarter *"Best Quality Near Miss Report Awards"* from BP Remediation Management Group from EMA
- 2007 - The most *"Near Miss"* reporting company award during the first and second quarter throughout the BP EMAAP region (Europe, Middle East and Africa)
- 2008 - The *"Best Safety Behavior Award"* for a company from the BP Remediation Management (RM) Group
- 2008 - The *"Best HSSE Performance"* in the Best HSE Behavior Demonstrating Company award from BP Account Team
- 2009 – The AECOM Cooperate *"Safety in Action Award"* for 1998 – 2008 for "0" work accidents, in the commitment to employees and environmental category
- 2011 – BP Remediation Management Contractor Performance Award - in recognition of two years and over 5,000 hours of incident-free work
- 2012 - BP Remediation Management Contractor Performance Award - in the recognition of three years and over 10,000 hours of incident-free work.

Our people

AECOM attracts and retains the best talent worldwide, and that focus is reflected in the calibre of our people. Our staff members, who represent a wide range of diverse cultures, knowledge and experience, repeatedly earn awards and recognition for their professionalism and technical excellence. Driven by a well-defined set of core values and united by a common purpose – to enhance and sustain the worlds built, natural and social environments – our people are our key recourse, applying a fusion of science, engineering and design to address pressing environmental and infrastructure needs. They work hard to bring about positive change in the world, reflecting AECOM's corporate commitment. Our people are dedicated to environmental sustainability and to socially responsible work, helping clients and their communities find long-term solutions to a variety of challenges.

Third Bosphorus Bridge

Istanbul, Turkey

Services: Environmental and Social Impact Assessment (ESIA) and Environmental and Social Monitoring Study of Northern Marmara Motorway, including the Third Bosphorus Bridge

Project Experience in Turkey

An aerial photograph of the Third Bosphorus Bridge in Istanbul, Turkey, during its construction phase. The image shows the bridge's deck, which is a multi-lane highway, with various construction vehicles and equipment visible on the surface. The bridge is supported by a large, blue, A-frame pylon structure. The bridge spans across the Bosphorus Strait, with the blue water of the strait visible on the left and the green, hilly land of Istanbul on the right. The sky is clear and blue. The text 'Project Experience in Turkey' is overlaid on the left side of the image.

Environment

Understanding the critical need to protect, enhance and manage the world's natural resources, our environmental teams deliver comprehensive solutions to environmental challenges associated with regulatory drivers and business-critical concerns.

Our work around the world spans a broad range of industries, including the energy sector, and addresses a spectrum of compliance, management and permitting issues associated with air-pollution control, water/natural resource and habitat protection, site remediation, restoration, construction and waste.

We provide the following services:

- Environmental and Social Impact Assessment & Project Permitting
- Environmental, Health & Safety Due Diligence for Transactional Processes
- Environmental, Health & Safety Compliance Assessment & Management
- Environmental and Social Management Planning
- Environmental and Social Monitoring Services
- Remediation Consulting and Engineering - Soil & Groundwater Investigations
- Remediation Construction, Site Restoration and Hazardous Material Removal
- Bird and Bat Surveys
- Environmental Modelling
- Hydrological and Hydrogeological Services
- Mine Water Management
- Waste Management
- Geochemical Services
- Ground Engineering Services

Sectors that we cover:

- Chemicals/ Pharmaceuticals
- Power
- Government
- Manufacturing
- Agricultural Production
- Mining & Metals
- Oil & Gas
- Transportation

Transportation

We use our extensive knowledge of planning, designing, and managing infrastructure, as well as, restoring and replacing aging infrastructure, to help our public and private clients find smarter, more advanced ways to move people across cities, countries and continents.

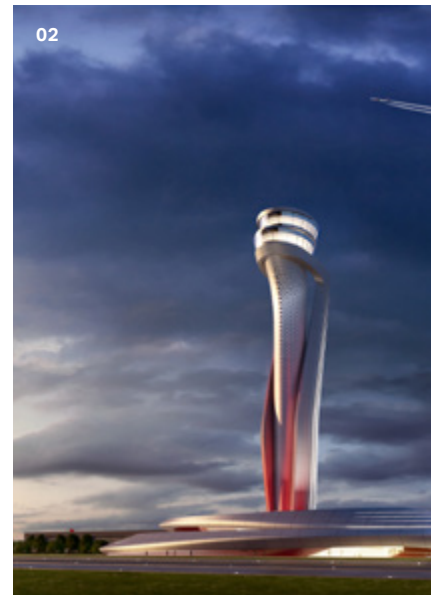

Our integrated approach and social responsibility have earned us the trust of local municipalities, government agencies, commercial clients and public-private partnerships. Our expertise and global reach enable us to deliver high-quality solutions for our clients that pave the way for long-lasting benefits to society.

Services we provide:

- Planning
- Design
- Design Review
- Value Engineering
- Lender's Technical Advisory Services
- Loan Monitoring
- Supervision
- Programme Management

In following sectors:

- Aviation
- Highways & Bridges
- Ports & Marine, Transit
- Rail & Mass Transit

02

01 Istanbul New Airport

Turkey

Services: Concept Design, Preliminary Design, Detailed Design, BOQ, Specifications for Airside Design

The airside package includes masterplanning, airside infrastructure and Airside Systems within the project.

02 Istanbul New Airport

Turkey

Services: Design of Air Traffic Control (ATC) tower and technical building. The competition scope was to deliver the concept designs for the tower, showcasing contemporary sustainable architectural design that reflects the multi-cultural and historical characteristics of Istanbul city.

03 Golden Horn Unkapanı Highway Tunnel

Istanbul, Turkey

Services: Preliminary Design; Technical, Economic and Financial Feasibility Studies

The project comprise 860 metres of submerged tunnels along approximately 7.5 kilometres of highway.

04 AsyaPort Container Terminal

Tekirdag, Turkey

Services: Lenders Technical Adviser to EBRD

The project comprises the construction of a new container terminal on a green field site. The construction works include a 1,330 metre quay wall (berth), 35 ha (approximately) of reclamation land, yard paving and services, buildings, utilities, and container handling equipment.

05 Izmit Bay Bridge

Izmit, Turkey

Services: Support for selection of EPC contractor & design review

AECOM provided services for the preparation of the RFP design, and the supervision of the selection of an EPC Contractor. We are currently reviewing the design.

International Development

We deliver International Development services through dedicated practice areas, working with clients in the public and private sectors to achieve sustainable development outcomes through cost-effective, innovative and equitable activities. We help the world to respond to the extraordinary challenges of an interconnected and fast-paced international environment. Building on our private-sectors relationships and multi-disciplinary expertise, we deliver integrated, comprehensive solutions to International Development challenges with integrity, transparency, accountability, innovation and reliability.

AECOM International Development provides technical assistance, project management and consulting and advisory services for following sectors:

- Economic Development
- Rural Development
- Public Finance Management
- Social Development
- Water
- Climate Change
- Rule of Law & Governance
